TECHNICAL SKILLS

- **Languages:** Python, JavaScript, C/C++, Java, SQL
- **Frameworks & Lib:** Flask, Fast API, React JS, Node JS, Streamlit, Pandas, NumPy, Scikit-learn
- **Databases:** MongoDB, BigQuery, Firestore, MySQL, Redis
- **Cloud :** Google Cloud (GCP), Azure
- **Tools:** Git, GitHub, Docker, Kubernetes, Github Actions, GCP Cloud Build,
- **No code/low code & Testing :** Postman, MS Power Automate, Power Apps, Figma
- **AI/ML Tools:** LLMs, NLP, Agentic AI & RAG Integrations, Fast MCP, Gemini CLI, Cursor,, LangChain

EXPERIENCE

Software Engineer - Executive | WPP Media – Gurugram, IN | (1.5 year+) **July 2024 – Present**

- Developed and maintained scalable backend services using Python Flask, following RESTful API design principles.
- Built 20+ **RESTful APIs** to streamline **ad performance data** from platforms like Google Ads ,DV360 & Meta into **BigQuery**.
- Developed **Meta Ad Campaign Creation Tool** using Meta Graph API to streamline client–business–planning–activation team workflows and reduce ad campaign creation time by ~30%, with a React-based UI for centralized visibility.
- Automated **Power BI dashboards creation** using Microsoft Graph API to cut manual dashboard creation efforts by ~70%.
- Implemented CI/CD pipelines using Cloud Build and Docker to automate testing and deployment of services to Google Cloud Run.

Software Engineer - Intern | WPP Media – Gurugram, IN | (6 Months) **Jan 2024 – June 2024**

- Automated manual Excel-based report & dashboard creation using **Flask API & Openpyxl framework** with **GCP Cloud Run**, integrated with Power Automate for mail based trigger – saving around 50 hours per month for the team.
- Built and maintained scalable backend services using **Python flask** with versioned endpoints and authentication; added unit/integration tests and **Postman** collections for regression.
- Automated daily ad-performance reporting for Meta, Google Ads & DV360 using Python Flask API sending reports to client’s AWS S3 buckets.

PROJECTS

NutriAI - AI-Powered Diet Recommendation App | [NutriAI](#) | [github](#) **Dec 2025**

- Developed a **React based AI chatbot App** for real-time nutritional coaching and diet management.
- Built Regex-based parser to transform raw LLM text into interactive "Quick Action" buttons. a side panel to visualize BMI, BMR and Metabolic Age
- Build a responsive UI using **Tailwind CSS** and **TypeScript**. Used **Vertex AI - Gemini 2.5** for **LLM inference** with streaming SSE support.
- Hosted on **Vercel Edge Functions** to securely proxy API requests and maintain user sessions via **LocalStorage**.
- Integrated **Vercel KV (Redis)** for daily rate limiting and
- built a custom Regex-based parser to transform raw LLM text into interactive "Quick Action" buttons.

AI-Driven Meta Ads - MCP Server| [github](#) **Nov 2025**

- Built a **Model Context Protocol (MCP) server** using Python and **FastMCP** to expose Meta Ads operations (campaigns, ad sets, ads, creatives) as AI-callable tools.
- Integrated **LLM inference (Vertex AI - Gemini 2.5)** to translate natural language into structured Meta Ads API interactions for creation, updates, insights, and optimization.
- Implemented full support for reading, creating and optimizing ad resources with the latest **Meta Graph & Marketing API v24**, including automated Advantage+ campaign defaults and placements.
- Delivered AI-driven performance insights and strategic optimization recommendations through conversational prompts, enabling natural language campaign management.

EDUCATION

- **Master of Computer Application**, CGPA: 8.6 (Lovely Professional University, Punjab, IN) 2022-2024
- **Bachelor of Science - PCM**, 65% (LM College, JNV University, Rajasthan, IN) 2019–2022

CERTIFICATIONS

- **Fast Prototyping of GenAI Apps with Streamlit**, DeepLearning.AI | Coursera [\[Link\]](#) Dec 2025
- **API Integration - End to End Web Development**, Board Infinity | Coursera [\[Link\]](#) Dec 2025
- **Google Vector Search and Embeddings**, Google Cloud | Coursera [\[Link\]](#) Sept 2024
